LIVING BUILDING CHALLENGE™

Filament only. See page 6

Top Product Features

- PrentaLux 200's is a series of decorative products using Signify's 3D Printing technology with an integral LED light engine.
- Outer shade has 3 texture options, and inner shade has 3 different texture options.
- 16 opaque color options for outer shade and 4 opaque color options for inner shade.
- 2700K, 3000K, 3500K, 4000K and only available in 90 CRI.
- 8 Light Levels ranging from nominal 1000 to 7000+ lumens.
- Universal Voltage (120-277V).
- 1% Dimming.
- 3D printed mounting canopy available in disk or conical shape.
- 5 Year Warranty.
- Silver power cord.
- BAA compliant. RoHs compliant.
- Finishes available on [Material Bank](#)

Dimensions

Sustainable Product Features

- PrentaLux 3D printed parts are produced with at least 55% mass balanced bio-circular materials. Effective Q3-2023.
- 61% of the 205 light fixture is made of 3D printed material.
- ISCC certified. Certification applies only to 3D printed material. See page 6
- [Declare compliant](#)
- LBC Red List Approved

1. See page 3 for color options.	1. See page 4 for texture details and options.	1. Consult factory on Premium Option lead times. 2. See page 3 for color options.	1. BR - Baffle and FL - Floral, textures only available for inner shade. 2. See page 4 for texture details and options.	1. Standard length of cord - 10ft [3050 mm]. Max available length is 25ft [7.62 m] and Consult factory for lengths longer than 10ft. 2. Power cord is always silver.

Product Specifications

Construction

- PrentaLux 200s consist of an integral LED light engine and a proprietary additive manufacturing process for the polycarbonate shade and components. Thermally, mechanically, and optically optimized for professional/commercial installations.
- Designed, engineered, and printed in the United States.

Electrical

- Standard 0-10V driver integrated into the pendant head (120/277V/ 50-60Hz).

LED and Light Engine

- Available in 2700K, 3000K, 3500K, and 4000K CCT and 90 CRI only. Lumen packages ranging from nominal 1000, 1500, 2000, 3000, 4500, 6000, 7000+ lumens. (subject to specific CCT and Light Level).

Driver

- Standard offering is 0-10V with 1% dimming.

Optics

- Polar plot and UGR data on page 5.

Environment

- Suited for 25° ambient. Dry location only.

Shielding

- Shade optic depth and design provides excellent physical cut off.

Finish

- 16 outer shade colors available. 4 inner shade colors, with standard option of high reflective white for maximum output and 3 colors as premium options with longer lead times. 3 inner shade textures offered. Additional colors and textures available with extended lead times. (Consult Factory)
- Finishes are available for review on [Material Bank](#) under Cooper Lighting Solutions PrentaLux brand.

Mounting

- Mounting options include UL certified cord and option of 3D printed disk shape or conical shape, mounting hardware.

Lengths

- Fixture comes with 10ft cord. Lengths up to 25 ft possible. (Consult factory as longer lead times apply).

Weight

- All products are light weight and much easier to install than traditional pendants. All fixtures are less than 10lbs

Warranty

- Standard five-year limited warranty on all parts.

Compliance

- Components are UL recognized and luminaires are cULus listed for 25° C ambient environments. Dry Location Listed
- Filament material is UL certified.
- BAA compliant
- RoHS compliant
- Declare Compliant, LBC Red List Approved, ISCC Certified
- Not to be installed in food prep areas and hazardous environments which may expose the product to pollutants such as oil, grease, or VOCs.
- IK02 impact rated. Not for installations in locations such as gymnasiums, arenas, sports complexes, multi-purpose rooms, and any other locations where the fixture potentially will be subject to impacts from external sources.

Sustainable Products Specifications

- PrentaLux 3D printed parts are produced with at least 55% mass balanced bio-circular materials. Effective Q3-2023.
- 61% of the 205 lighting fixture, is made of 3D printed material.
- ISCC certified. Certification applies only to 3D printed material. See page 6
- Declare compliant
- LBC Red List Approved

Circularity

The Circular Economy is “an industrial system that is restorative or regenerative by intention and design.” and relates to the production and consumption through: Reducing, Reusing, and Recycling products. The PrentaLux 3D printed lighting products contribute to the Circular Economy by reducing carbon emissions, reducing components by design and technology of 3D printing, reuse our misprints that reduce carbon dioxide impact, and are recycling waste from food processing and wood pulp industries to be repurposed into the filaments used to 3D print the PrentaLux products.

REDUCE

35% weight reduction reduces carbon emissions by requiring less fuel for shipping

REUSE

When polycarbonate is recycled, it generates up to 86% lower CO2 impact compared to virgin polycarbonate.

RECYCLE

Our 3D printed parts are created with over 55% recycled or bio-circular materials.

Material Sustainability through Production and Supply Chain

Each of our 3D printing manufacturing plants have been audited by the ISCC (International Sustainability and Carbon Certification) organization to verify the implementation and use of environmentally, socially and economically sustainable production and materials.

** PrentaLux products will convert to printing our 3D parts with over 55% recycled or bio-circular materials (using an ISCC certified mass balance approach) within Q3 2023. Bio-circular materials are raw materials from ISCC Plus certified waste streams and residues including tall oils from the wood processing industry or used cooking oil from the food processing industry.*

PrentaLux products have a high percentage of the entire product that is 3D printed as well as having the filament come from bio-circular materials.

PrentaLux products are produced in a manufacturing facility where over 99% of generated waste is diverted from landfills

Material Transparency

LIVING BUILDING CHALLENGE™

The ILFI (International Living Future Institute) has created a program where manufacturers can disclose the components or “ingredients” of a product. This disclosure has a rating system that shows transparency in the materials chosen in developing products, and whether there are any chemicals of concern, to help meet the requirements of leading green building standards that support human and environmental health.

LBC Red List Approved

- Disclosed 100% at content inventory of 100ppm
- Suitable as a compliance pathway for LEED v4.1 Material Ingredients credit Option 1 Material Ingredient Reporting
- Suitable as a compliance pathway for WELL v2 Feature X07 Materials Transparency Parts 1 and 2
