

# HEALTHCARE

Technology Solutions

Cooper Lighting Solutions' Trellix Locate leverages the Wavelinx Pro sensors embedded in lighting fixtures to provide environmental monitoring capability and location information for assets and people with precision.

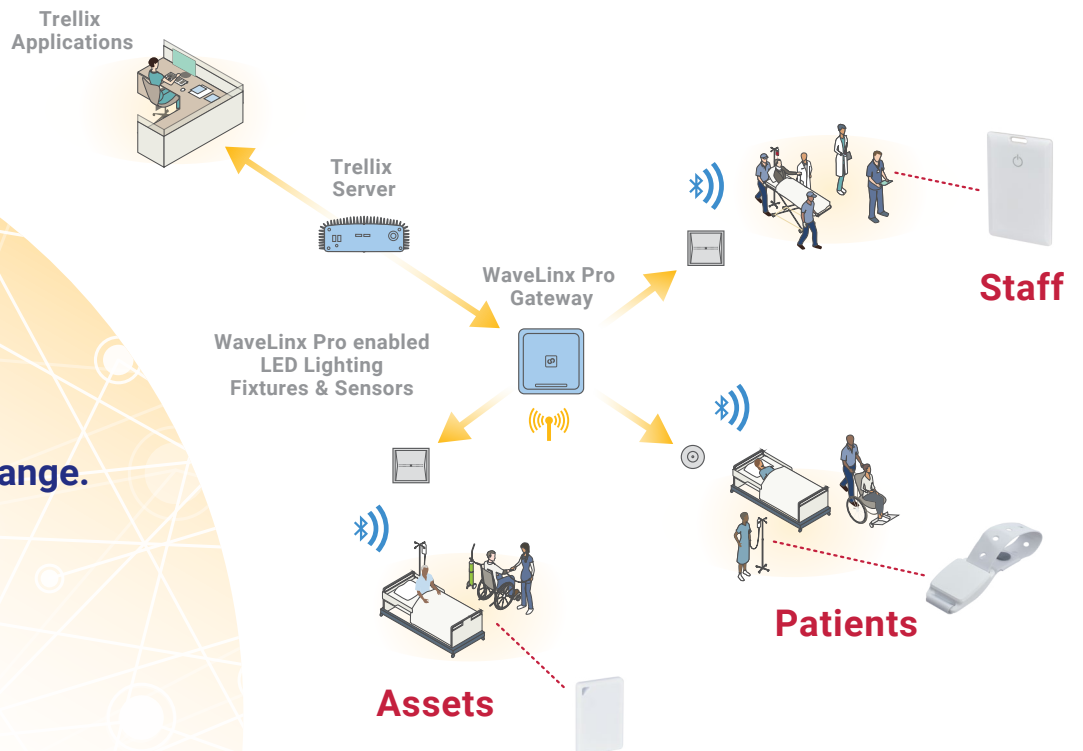

Trellix enables seamless data exchange with third party system via industry standard protocols and building automation interfaces.

In addition to open platforms for integrations, we offer wearable IoT tags, intuitive web-based software, and a robust location engine, making Trellix Locate ideal for healthcare facilities.

**Collect. Analyze. Exchange.**

SCAN for more Trellix Locate information

## Asset Management and Utilization:

*Find your assets quickly within the facility*

With Trellix Locate, you can tag and record what's most important to you. It allows you to easily determine the real time location of people and medical equipment.

- Leverage the list and floor plan to view real time asset location
- Save time searching for equipment
- Historical reporting
- Utilize dashboards to study trends
- Monitor alarms in real time
- Get real time and historical par levels
- Get preventive maintenance alerts

## Patient Workflow and Staff Safety:

*Reduce manual intervention to automate processes*

For every healthcare facility safety is the top priority. Cooper Lighting has built a cost-effective system to ensure staff members and patients can send alerts in times of distress using the push button. Trellix Locate and its partners helps achieve high level of efficiency, patient wellbeing and care and compliance.

- Duress
- Staff response time
- Understand patients' wait times
- Keep a track of patients' location during their visit
- Patient elopement

## Environmental Monitoring:

*Reduce spoilage, promote infection control and patient well being*

It only takes a few minutes or hours to be out of range and you can lose everything. Being able to accurately monitor the temperature and humidity in real time has impactful benefits. Trellix Locate, in addition to real time location, provides the ability to monitor temperature and humidity and report the change in environmental conditions. This can be important in-patient rooms to ensure comfort and wellbeing, storage areas, surgical rooms, refrigerators, and freezers.

- Get historical temperature reports
- Get real time notifications when thresholds are breached to reduce spoilage of expensive assets such as medications, vaccines etc.
- Monitor room conditions to maintain appropriate level of humidity and temperature in patient rooms, surgical rooms, operation theatre's etc.
- Eliminate manual temperature logging for automated streamlined compliance

## Infection Prevention:

*Control the spread of disease and reduce infections*

Infections have always been a big health concern. One in 25 patients receive a hospital acquired infection (HAI). Trellix Locate can provide actionable insights to help curb and manage infections within a healthcare facility.

- Contact tracing
- Capacity alerts
- Social distancing alerts

## Facility Management:

*Manage the entire system through a single user interface*

Provide a comfortable environment to patients and staff.

- Respond to the change in light level requests easily and quickly
- Create area scenes and schedules to shift mood and perception.
- Allow users to control, set levels and tune individual lights from a graphical floorplan
- Create schedules to disable wall stations during specific hours
- Manage lights based on occupancy

## Analytics:

*Improve day to day operations*

- Monitor capacity
- Room utilization rates
- View equipment status
- Utilize data to identify trends and bottlenecks

## Trellix Partner Program

Our partner ecosystem enables developers and system integrators to leverage the data gathered by the Trellix Platform to create brilliant customer experiences. Using APIs, systems can collect valuable data from the Trellix platform—such as spatial organization, space usage, asset information, and asset location— to deliver fully-integrated solutions.

**Together...**  
*we can make every space limitless*
